SHIFT 1

- Positie QOL
- Promoting green growth
- Reducing -ve externalities
- Increasing subsidiarity

SHIFT 2

- People/collectives own the issues
- Prioritise climate informed choices & act towards it

SHIFT 3

- Increase collaborations among actors
- Actors embed subsidiarity into their work

SHIFT 4

- Intersectionality in solutions
- Adaptations inform mitigation
- Integrating alt. models into mainstream ecosystem

SHIFT 5

- Moving from two of the complexity iceberg to re-designing
  (a) underlying structures &
  (b) mental models
